

MOBILE WATER TREATMENT UNITS

for surface and underground water

Unique and patented technology based on the „CLARIFIER“ researched and developed by Ing. František Svoboda, CSc., a leading czech scientist in the water industry, more than 40 years of research, development and perfection.

OUR HIGH-PERFORMING SOLUTIONS
ARE FOR YOUR COMFORT,
FOR YOUR BUSINESS
AND FOR YOUR CUSTOMERS

- ↪ Residential Solutions
- ↪ Commercial Solutions
- ↪ Industrial Solutions
- ↪ Municipal Solutions
- ↪ Agriculture Solutions

MOBILE WATER TREATMENT UNITS

for surface and underground water

COMPACT PURIFICATION UNIT WITH POSSIBILITY OF MODIFICATION
UNIQUE MOBILE TREATMENT UNIT. IT CAN BE PUT INTO OPERATION WITHIN MINUTES

Triton 500

 0,5 m³/h
 2 400
 30 W

Mobile Trailer
Water 1500

 1,5 m³/h
 7 200
 2,5 kW

Container Water
Treatment Unit

 10 m³/h
 48 000
 5,5 kW

AREA'S OF USE

Medium and small municipalities

Army

Humanitarian aid

Hospitals, Hotels

Industrial enterprises

Mining industry

Swimming pools, Water parks

Agriculture

Industries, Small breweries

Firefighters, Police

Concerts, Festivals

Camps

Natural disasters

EFFECTIVE WATER TREATMENT TECHNOLOGY,

where it is most needed.

APPLICATION

- » ensuring drinking water in regions suffering from lack of drinking water
- » immediate ensuring drinking water within natural disasters (earthquakes, floods, disruption of infrastructure, contamination of drinking water,...)
- » immediate ensuring drinking water within the humanitarian aid and crisis situations (supply actions, refugee camps, peacekeeping field operations)
- » ensuring drinking water for Armed forces (military field hospitals, military camps, military trainings, deployments in peacekeeping missions)
- » ensuring high-quality water for operation of hotel swimming pools, aquaparks etc., significant water savings (return within 12-18 months)
- » ensuring clear servicing water for industrial plants and mining industry
- » ensuring enough clear water for irrigation in agriculture industry

MOBILE WATER TREATMENT UNITS

for surface and underground water

ADVANTAGES

- » output water is always potable, crystal clear and tasty
- » clarifier is not affected by changing the quality of input water
- » we treat many types of pollution (particle, chemical, biological, industrial, radioactive, oil, ...)
- » compact modular design, easy to transport, commissioning and overall operations, directly constructed in our factory
- » option to connect it to reverse osmosis to treat desalinated water
- » limitation of construction works, only baseplate for container positioning
- » simple and fully automated operation including sludge discharging, manually only refilling of chemicals

Please feel free to contact us
if you need any further information.
